The private-sale inventory your tiers prove exists — agency-grade, brought to you first.

August 2026 · A conversation starter, not a contract — every number below is open for discussion.

Who we are

Sold Direct is a WhatsApp-native platform for private property sales — 0% commission on the qualifying path, launching in prime Cape Town. We operate as a **property practitioner (PPRA, FFC)**, with registration completing ahead of launch: our practitioners hold every mandate, our listings are agency-grade, and bond origination runs through BetterBond. We are not a portal and never will be — **Property24 stays the shopfront**.

~70 → ~2,070
live listings per year, Y1 → Y5 (base case)

R6.5m
average asking price at launch (prime Cape Town)

R0.3bn → R5.8bn
annual sold value flowing through the portal

Why this is incremental for Property24

New inventory	Your own private-listing tiers prove prime sellers want to sell without a mandate — but a self-managed ad is where many of those sales stall. We run the whole journey for them as registered practitioners and bring the homes to Property24 as one practitioner account with a clean, structured, agency-grade feed.
No cannibalisation	Complementary, twice over. Your retail private-listing tiers (R499–R4,999) serve DIY sellers; we serve the run-it-for-me segment as a volume customer — both grow the private-sale audience on Property24. Full-service agencies' stock — and their subscriptions — are untouched. This is audience Property24 adds, not audience it moves.
Better listings	Every listing is validated end-to-end (erf, rates, levies, compliance status) with professional photography and floor plans — high-engagement stock in the price bands your advertisers want.
Demand loops back	Our buyers start on Property24 — every listing carries a one-tap WhatsApp enquiry, and every completed sale is proof the portal works. Your traffic, our transaction rails.

The volume we bring (base case)

	Y1	Y2	Y3	Y4	Y5
Live listings	~70	~160	~460	~1,070	~2,070
Registered sales	50	110	325	750	1,450
Avg price	R6.5m	R5.75m	R5.0m	R4.5m	R4.0m
Sold value	R0.33bn	R0.63bn	R1.6bn	R3.4bn	R5.8bn

The partnership we propose

1 · Tiered rates	A single-account **wholesale** agreement priced **per live listing**, stepping down with committed volume. Your retail private listings are **R2,299–R4,999 each**; we bring a

	committed monthly pipeline through one practitioner account — wholesale economics for guaranteed inventory, squarely in the spirit of the Competition Commission's OIPMI principle that portal pricing should be volume-fair, not size-punitive.
2 · Launch rate	Your published 2026 card prices our launch profile (51–150 leads, R6m–R8m median band) at **R7,153/month** — the top price columns, for exactly the inventory the portal can't source elsewhere. We're asking to **enter at SIBP level (R656/month)** for the pilot and step up the published tiers at agreed lead milestones, so pricing tracks delivered volume, not projections.
3 · Success option	We're open to a success-based component — Property24's own SBF model (R199 per sale registered at the Deeds Office) is a precedent we like: aligned incentives, zero risk to you.
4 · Clean feed	Standard interoperability (per the OIPMI remedies, at no feed fee), one technical integration, one account manager — none of the admin overhead of hundreds of small accounts.

Why now

The private-sale segment is growing — your own private-listing tiers show the demand. What it lacks is practitioner-run, transaction-ready inventory; whoever hosts that first gets the listings, the audience and the story. We're signing our portal partnerships for launch this quarter — we'd like Property24 to be first on the list.

Volumes are base-case projections from the Sold Direct financial model (model-grade, unaudited); listing volumes assume ~70% sell-through.
